RIVER NEWS.

The Ohio, opposite this port, continues to recede slowly but steadily, the late heavy rains having had no effect upon the stream, which declined during the twenty-four hours ending last evening, fiveor six inches, leaving, according to the Water-works report, a channel-depth of about seven and a half feet at this point. The river at Pittsburg was rising yesterday, with four feet six inches water there at noon.

Business on the Landing yesterday was fairly active, less so than it should be, however, at this season, and freights were moderately offered; those for the upper ports being quite light. Our quotations are as
